INTEGRATED LIGHTING

Our integrated lighting rangeisdesigned to work with furniture like bookcases, kitchen cabinets, media units and wardrobes. The different types of LED lighting save energy and are ideal for narrow spaces. They can either be controlled by remote control, motion sensors or standard socket switches.

- 12 watt LED lights
- Warm white colour
- Available in three sizes,
  70mm round
  400mm strip
  1900mm strip
- Aluminium housing
- Dimmable remote available
- Motion sensors available
- Easy Install

Jewellery Tray (See page 88)

MAINTENANCE

Our wrapped doors are a durable and easy to clean product, however there are some limitations on their use in certain applications.

It is our recommendation that all end users are made aware that if **high temperatures** or **excessive water** are present this may cause the edges to peel back, which can result in failure of the product.

Areas for particular caution:

- If doors are fitted adjacent to ovens, always ensure that they are shielded from heat using heat deflectors. Doors must not be fitted any less than 750mm above a hob. Contact your supplier if you require more information.
- Never use appliances that generate heat, such as a toaster, directly underneath our doors.
- Never allow concentrated steam (e.g. from a kettle) to be released directly underneath a PVC edged or vinyl wrapped door.
- Never allow a PVC edged or vinyl wrapped door to become saturated with water.
- For cleaning use a damp cloth and a non-abrasive domestic cleaner, do **NOT** use bleach.

With the correct care your doors will give you many years of trouble free service.

This customer care information does not affect your statutory rights.

6 year Guarantee
We guarantee all products supplied for a period of six years from the date of delivery. Strictly no consequential losses.
