FURNITURE CARE & MAINTENANCE

PRE-INSTALLATION RECOMMENDATIONS

Ensure that all new-builds or newly plastered rooms have been left to environmentally stabilise prior to the installation of new kitchen doors. Kitchen doors must not be installed into a damp or moisture-rich environment as it will cause undesirable movement in the joints and panels of the door.

LIGHT

Timber changes colour when it is exposed to light. The species of timber and intensity of exposure will affect the rate of change. Due to this we recommend that timber samples displayed in showrooms be changed regularly. It is advised that colour change is also taken into consideration when fitting new or replacement doors to an existing kitchen some time after the original kitchen was installed.

CLEANING

- do not use wax-furniture polish, abrasive or aggressive cleaners, bleach or other hypochlorite (chlorine) based cleaners, multi-purpose cleaners, dilutes, acetone alcohol, solvent or similar products on any door, as this will damage the surface;
- only use a 5% soap, 95% water (liquid soap) solution, wiping with a damp (not wet) cloth, finally drying with a soft clean cloth only.
- ensure all cooking splashes are wiped immediately with a damp cloth;
- dust with a soft cloth only.

MOISTURE

Excess moisture can damage a timber product - it is recommended that susceptible areas such as around the sink are thoroughly maintained and kept dry at all times.

This brochure is intended only as a guide to Novelle products and, as no picture can accurately convey the true beauty and outstanding quality of our furniture, it is suggested that you visit a Novelle by Aisling showroom to examine the product personally before purchase. Only then can you appreciate the detail bestowed upon each and every component, the rich, sumptuous finishes applied and the superior quality craftsmanship that is lovingly ingrained into each piece.

Whilst some of our products are made wholly from natural materials, a number are also made (in whole or part) from man-made materials, as they can be more durable, flexible and/or practical than natural products. Our retailers will be happy to discuss all details of the materials used in the production of our furniture so that you are fully aware of how and why they were selected.

Most of the images used in this brochure are representative of Novelle furniture designs but there may be variations in colour, design and function.
