ROT PUNKT KÜCHEN

ROT PUNKT KÜCHEN

In a kitchen, people work, cook, boil, stir, roast, fry and, sometimes, spill. No matter what surface you have chosen, laminate, lacquer or foil, all surfaces are made to be easy to clean. Besides, after many years of use, they still look perfect. Another focus in our range is on wooden kitchens, which we offer as “Oak Line”, “Forrest Line” and “Classic Line” with a high proportion of expert workmanship.

Limits? In our company there are not that many. Design, quality and functionality are the forces that drive us. We strive to set new standards, employ cutting edge technology and provide more and better components and fittings. We were established in 1930 and since then have fulfilled our customers’ requirements and their requests not only for design and décor, but also for longevity and functionality. As a family-run company with a long tradition, we are situated in the cradle of the German furniture and kitchen industry (the so-called chipboard valley) with 3 pr oduction plants. From here we supply our merchandise to more than 20 countries world-wide. Limits? We don’t know them here either.

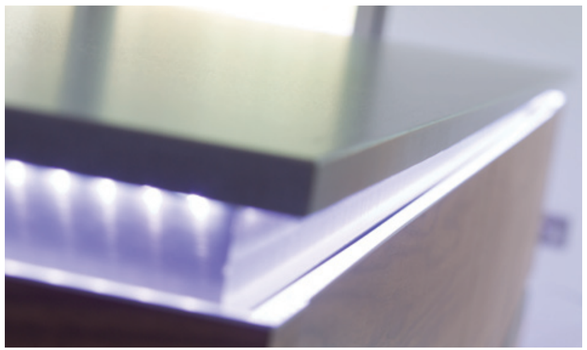

Those who choose a Rotpunkt kitchen do so because they expect top quality and find this in our kitchens.Colour fidelity, precision engineering and overall perfect workmanship are always our aim, as well as the longevity that results from this. To achieve this self-imposed very high standard, we rely on a mixture of industrial production and individual workmanship.This, coupled with a thorough quality control, results in an endproduct which convinces our customers.

Heinrich Rabe and Wilhelm Meyer established the company in the 1930s, when Buende was mainly the centre of the German cigar making industry. Consequently, they started with the production of cigar boxes, progressed to making wooden toys and sewing boxes and, in the 1950s, to producing kitchen cupboards. Decades later, Rotpunkt is now an acknowledged specialist for top quality fitted kitchens. But Rotpunkt is still a family-run business which upholds the values of classic craftsmanship and respectable business. Tradition? This is something which is brought into perfect harmony here with the dual elements of latest technology/ machinery and timeless design.

n a kitchen, people work, cook, boil, stir, roast, fry and, sometimes, spill. No matter what surface you have chosen, laminate, lacquer or oil, all surfaces are made to be easy o clean. Besides, after many years ofuse, they still look perfect. Another focus in our range is on wooden kitchens, which we offer as "Oak Line", "Forrest Line" and "Classic
