OUR STORY

Swadling Brassware was founded by Jeremy Swadling in the 1970s from a small workshop in Petersfield, Hampshire, England.

Starting as a maker of bespoke wooden canopy baths and accessories, Jeremy then realigned his focus to creating Bathroom Brassware in keeping with the high quality of his original creations and the unique style of period English properties.

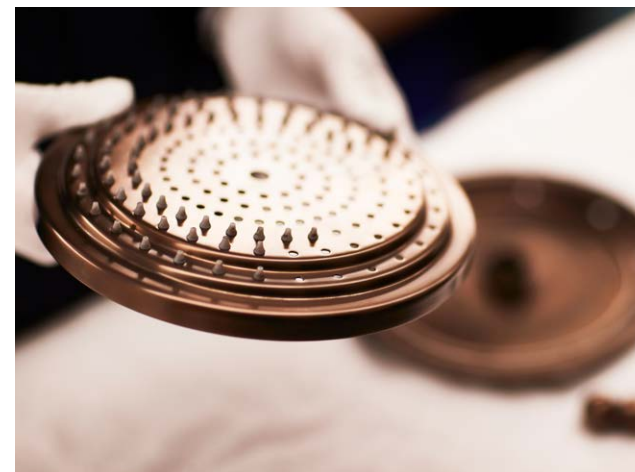

It was at this point when Swadling Invincible was born. The collection launched with a range of exposed traditionally inspired Thermostatic Showers which were among the very first in England to make use of thermostatic cartridges and the first to combine these with an on/off control in the same casting. This raised the bar for performance and safety in the bathroom and became the industry benchmark for exposed and then concealed Showers.

As Swadling Brassware progressed from these beginnings, expertise became established in the efficiency of water delivery alongside the thermostatic element. Swadling Brassware became the established expert in achieving high flow rates even at low water pressures and this industry-leading performance still persists to this day.

Today, Swadling Brassware remains focused on driving Brassware innovation, passionate about working with Classic design and dedicated to creating quality pieces, crafted and finished as carefully as the one-offs in Jeremy's first workshop.

The Swadling Brassware factory is still based in Waterlooville, Hampshire, England where all Shower Assemblies, Lavatory Faucets, Bath Faucets and Accessories are manufactured, plated and polished; operating with an expert team some of whom have worked with Swadling since the early days.

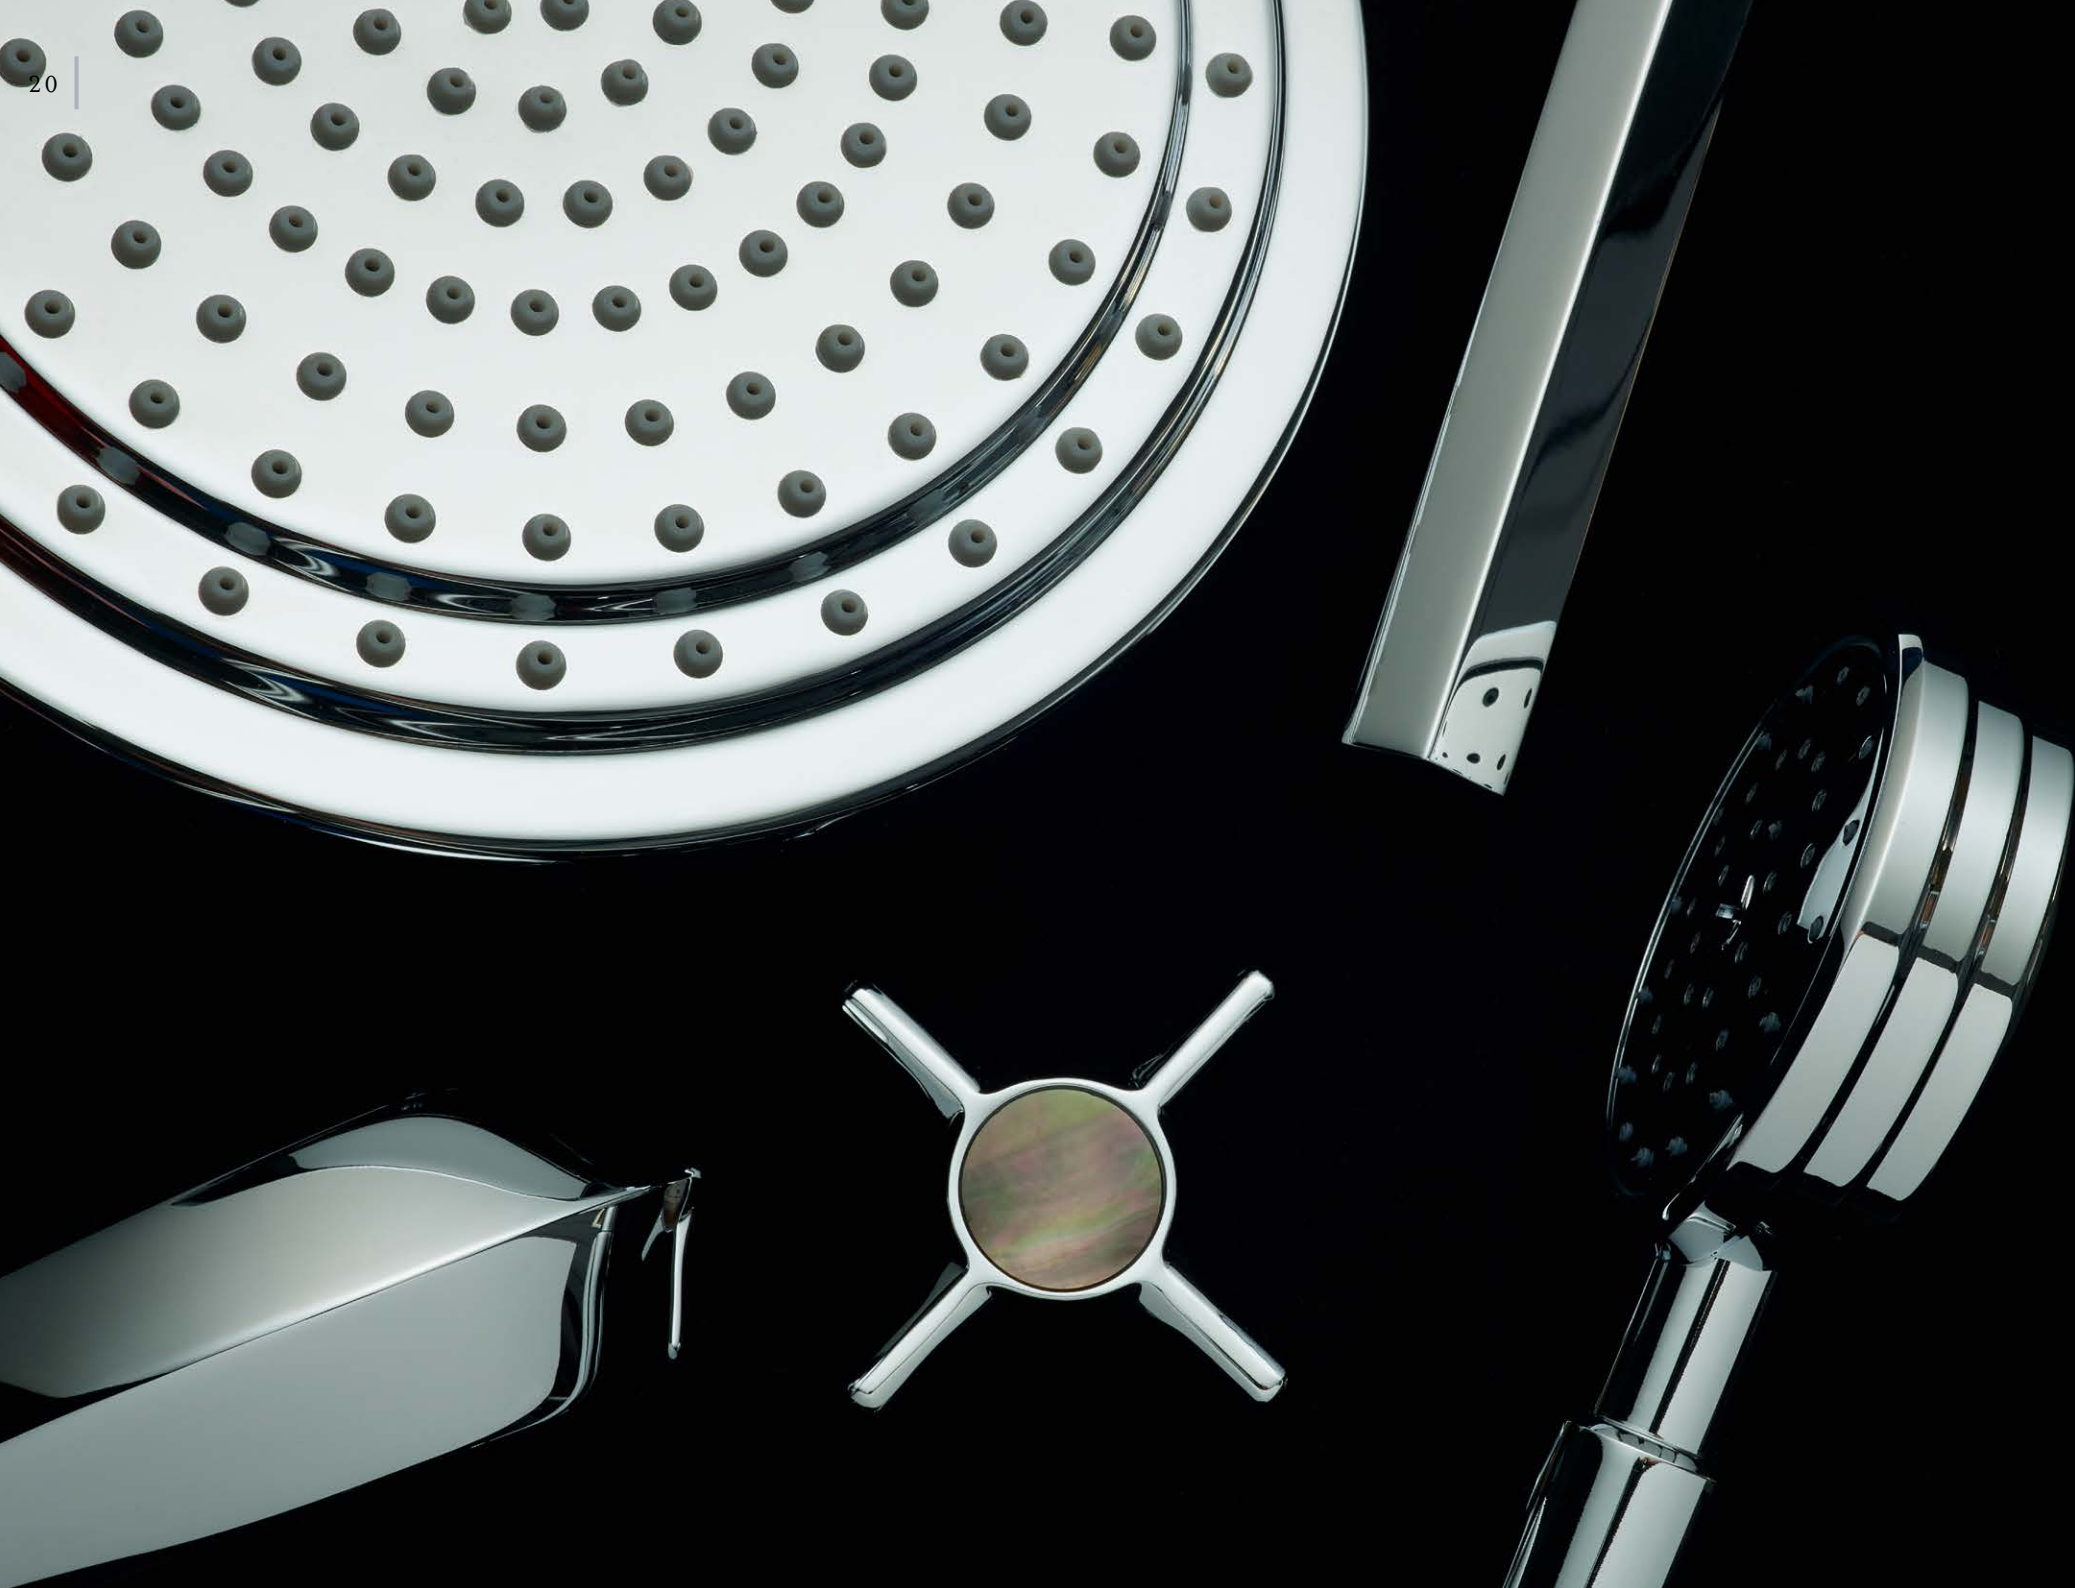

HANDCRAFTED

Our plating and production teams are based in Waterlooville, Hampshire, England. They craft and beautifully finish every single product by hand, before it is tested, carefully packaged and sent to its new home.

ILLUSTRIOUS

A bold symphony of linear, curved and geometric form. Hexagonal motifs, grand steps and soaring avion-inspired lines epitomise modernity; becoming in evocative classic bathrooms, iconic in contemporary settings.

Distinctive Mother of Pearl and Black Lip Pearl details conjure the rare and lavish ornamentation of the Art Deco era.

ENGINEER

Precision-made, elemental design. Tactile knurl detailing recalls our mechanical past, refined by distinguished bevelled edges and an assured control design.

Unique finishes – Living Brass and Dark Bronze – bring character and an industrial spirit to modern bathroom spaces.

INVINCIBLE

Period detailing and confident mechanical form express the prosperous grace of the late 19th century, creating a discerning traditional charm at home in Victorian, Georgian and Edwardian inspired bathrooms.

Dramatic black Ceramic elements and rich finishes transform the elegant appeal of the Invincible, granting an unexpected eclecticism.

OUR PRODUCTION STANDARD

Efficiency of water delivery and precision of water control is at the core of Swadling Brassware Design.

1. PRESSURE AND FLOW

Swadling Brassware Showers provide high volumes of water even at low water pressures due to the special consideration given to the dimensions, shaping and materials of the internal workings. Baths will fill more quickly and Showers will deliver a more satisfying experience.

Functioning perfectly with low pressures and high pressures up to 75 psi, ensures the full range of Swadling Brassware products are suitable for use with all plumbing systems.

2. TEMPERATURE CONTROL

Swadling Brassware has significant expertise in temperature control and temperature safety in the bathroom. Thermostatic Showers are accurate and responsive. All thermostatic and flow control cartridges are sourced from industry-leading suppliers.

3. MATERIALS

Brass forms the base material for most of the Swadling Brassware product range. It is a strong and reliable material for use in working parts such as

manifolds, controls and cartridges. For visible parts, Brass takes on a superior finish to other materials when plated; our Living Brass and Brushed Brass finishes allow the Brass base to develop an attractive oxidised patina over time.

4. FINISHES

Swadling Brassware expertly plate all components in-house, each component is then polished by hand. The plating and polishing team based in Hampshire, England, have years of experience at producing polished and brushed finishes of unparalleled quality.

Finishes include Chrome, Polished Nickel, Brushed Nickel, Gold, Brushed Gold, Living Brass, Brushed Brass, Aged Brass, Living Copper and Dark Bronze.

Living Brass, Brushed Brass and Living Copper are natural, unlacquered finishes and will age and oxidise over time, darkening and developing in unpredictable ways. Our Aged Brass and Dark Bronze finishes are achieved by chemically advancing the ageing process, they are also unlacquered and will change and develop over time in unpredictable ways. All Brass and Copper finishes will vary in colour and texture between and across parts from the very start.

5. TESTING, STANDARDS AND QUALITY

Swadling Brassware products are designed to the highest performance and safety standards, all relevant products are currently going through testing for compliance with NSF/ANSI 61; ASME A112.18.1/CSA B125.1; CEC; UPC; IPC.

All Showers are subjected to rigorous individual testing for flow and temperature control prior to packaging and delivery.

Swadling Brassware are ISO 9001:2015 certified, adopting a continual policy of improvement.

6. CHOOSING SWADLING

Swadling Brassware is available through specialist stockists, we always recommend visiting these showrooms to experience the product first hand and to discuss detailed requirements.

Please contact Swadling Brassware directly for any further enquiries.

GENERAL INFORMATION

This brochure seeks to convey an overview of Swadling Brassware and of its collections, products and options for customisation.

We strongly recommend viewing displays and seeking detailed expert advice from a Swadling Brassware stockist prior to purchase.

All images, finishes and colours featured in this brochure are for representation purposes only. Finishes and colours may vary across materials.

GUARANTEE

Swadling Brassware products can be registered for a 5 year mechanical guarantee against parts failure. For the guarantee to be valid, the products must have been installed and maintained in accordance with the product installation instructions and the care and maintenance advice on the Swadling Brassware website.

The Chrome finish is guaranteed for 5 years. All other finishes are not covered by the guarantee as some degree of change is to be expected. This is particularly true for Living Brass, Brushed Brass, Aged Brass, Dark Bronze and Living Copper finishes. They are unlacquered and will change in unpredictable ways. Any other special finishes are not covered by the guarantee.

Please see the care and maintenance section on the Swadling Brassware website for more information on looking after special finishes.

INSTALLATION

Installation Instructions accompany most Swadling Brassware products. They can also be found on the Swadling Brassware website.

The complete product must be inspected as it is removed from its packaging. If the product is damaged or there are issues with its appearance, this must be reported to Swadling Brassware prior to installing the product. No claim for damage or issues with the product's finish will be accepted after the product is installed.

Swadling Brassware products are high performing, shower mixers are suitable for installation on most water systems with pressures ranging from 3 to 73 psi, Lavatory Faucets with pressures ranging from 3 to 44 psi. Further details can be found on the Swadling Brassware website regarding specific product performance and water system compatibility.

PRICES

All pricing enquiries should be directed to a Swadling Brassware stockist. A list of stockists will be available on the website www.swadlingbrassware.com/our-stockists.

CHANGES

Swadling Brassware policy is one of continual improvement and we reserve the right to make changes to products without notice.
